AREAS OF EXPERTISE

- Python programming.
- Django
- Restful-API.
- MySql.
- Git
- Client Interaction.

Work Experience

Ecommerce Platform	November 2017 – Present	Software Engineer, Mindtree Limited, Bengaluru
--------------------	-------------------------	------------------------------------------------

TECHNICAL SKILL SET

- **Programming:** Python, Django

- **Database:** MySQL
- **Tools:** PyCharm, Git
- **OS:** Windows, Linux

PROJECTS UNDERTAKEN

Project Name: SAP Modernization & Integration project

Technologies Used: Python, Db2, Flask Framework & Sql.

Team Size: 6

Role: Python developer & Team Member

Project Description:

The Finance application of MSC industrial was migrated from AS400 to SAP S4HANA. This project mainly concentrates on building the framework in AS400 to send or receive data related to all the finance application transactions for SAP and also decommission the existing application in AS400. There were transactions related account payable (7 transactions) and account receivables (15 transaction) were built from the scratch.

Worked on the framework which is Extract-Compose-Transport model which enables to receive and send data in the form of XMLs and JSONs using bottle framework in python. Each and every program in this project dealt with linked list concepts, procedures, service programs, SQL queries and cursors.

Roles and Responsibilities:

- Understanding the end to end process of existing framework which is used to build all the transactions in the system.
- Gaining the knowledge on existing application to understand each transaction that going to SAP.
- Preparing design documents and estimations for requirements.
- Single point of contact in off-shore for all the issues that were faced in the project.

Project Name: Returns Project.

Technologies Used: Python, Db2, Flask.

Team Size: 6

Role: Python developer & Team Member

Project Description:

The main objective of returns project was to enable the customer to request for returns from the website. This project started because the customers of MSC were supposed to call the customer care to return the items they ordered. In this project, we created a UI in website for customers to create a return request for the items he had ordered. The request was redirected to AS400 for processing. The various stages of returns were captured during processing of a return and were shows as return status updates to the customer. This project reduced a very significant number of return request and return status phone calls for MSC.

Roles and Responsibilities:

- Understanding the return process and steps involved in it.
- Preparing design documents and estimations for requirements.
- Creating API for return request, cancellation of returns and monitoring the status of returns.
- Providing the required data to Elastic Search by storing the returns details in Mongo DB.

PERSONAL DETAILS

- **Date of Birth:** 26 May 1995
- **Gender:** Male
- **Email ID:** p.chandan19952@gmail.com
- **Current Location:** Bengaluru
- **Address:** #114,4th Cross, Banashankari 5th Stage, Bangalore
- **Languages Known:** English, Kannada and Tamil
